LIFEJACKETS SWEDEN

INFLATABLE LIFEJACKETS RACING

Lifejackets in this category are designed for active sailing and especially to be comfortable to wear for long periods. All lifejackets in Racing category are available with integrated spray hood and lifejacket light to comply with the current international yacht racing regulations.

LEGEND 190 WITH HARNESS

A newly developed model with extra buoyancy and excellent fit. With an airy mesh lining next to the body as well as detachable crutch strap. Legend 190 is further out on the shoulders and beyond the neck than many other models. The integrated safety harness has a woven attachment loop to secure the lifeline. Buoyancy 190N.

Model SLA is equipped with integrated spray hood, emergency light and mount for AIS and is therefore approved for World Sailing OSR.

The Inspection window is fitted so that you can visually check the two indicators of the automatic valve are showing green and that the lifejacket is ready for use. Five years guarantee.

Size: 40 -120 kg

INFLATABLE LIFEJACKET/BUOYANCY AID iFLOAT

The iFloat is Baltic's latest development designed to give maximum freedom and comfort. The inflatable lung is stowed in a pocket that can be sited anywhere around the waist. To deploy should you require buoyancy, simply pull the iFloat out of the pocket place over your head and inflate by pulling the inflation cord. Only suitable for swimmers.

50N BUOYANCY

iFloat 50 man navy, **Part Number: 5697**

LIFEJACKETS

A lifejacket is designed to aid the wearer to turn onto the safe back position and support the head so that the airways are above the water. This therefore makes it the obvious choice for all non-swimmers. All Baltic lifejacket models for new-born up to and including 15/20 kg are fitted with a wider crutch strap that can be clicked into two length positions to ensure a perfect fit. These lifejackets have segmented front panels so that they contour to the body and give freedom of movement. A lifejacket has more buoyancy on the front and less on the back, this ensures the lifejacket turns the wearer into the safe back position. The collar of the vest has nothing to do with the actual turning but helps to support the head so that the airways are above the water. All of the Baltic lifejackets are equipped with crutch strap, retro-reflective patches and a whistle.

There is also a model with integrated safety harness for the little ones, these harnesses are tested and approved according to EN ISO 12401 and have stainless steel D-rings for attaching a safety line.

BAMBI

Bambi is designed for new born babies up to the weight of 12 kg. The Bambi quickly turns the child into a safe back position. Extra soft material throughout the vest. Fleece-lined neck. Fitted with whistle, retro-reflective patches, two position crutch strap and lifting handle on top of the collar. Buoyancy 38N. Five years guarantee.

Size: toddler 3-12 kg.

SPECIALIST BUOYANCY AIDS

In this category you will find buoyancy aids that are specifically designed for particular activities and sports on or in the water. There are models for kayaking, fishing, sailing, canoeing and of course dinghy sailing. All of Baltic's buoyancy aids are tested and approved to the latest standards. Functional buoyancy aids are approved to 50N standard, this means that a buoyancy aid will keep you afloat with a good margin of safety but will not turn you on to the safe back position or support your head. Therefore 50N products are only suitable for swimmers and for persons over 25 kg. If you weigh less than 25 kg or are not able to swim you should use a lifejacket.

**DINGHY PRO

Special dinghy racing buoyancy aid. Used by a numerous national teams in World Cup Optimist racing. Zipped front pocket. Extra soft foam makes it the dinghy sailors favourite buoyancy aid. ALL PURPOSE BUOYANCY AIDS

An all-round buoyancy aid designed to suit general boating activities on or near water. When selecting an all-purpose vest the two most important parameters are fit and design, it should fit comfortably to suit your specific needs. All-round buoyancy aids are approved to the 50N standard, this means that a buoyancy aid will keep you afloat with a good margin of safety but will not turn you on to the safe back position or support your head. Therefore the 50N products are only suitable for swimmers and for persons over 25 kg. If you weigh less than 25 kg or are not able to swim you should use a lifejacket.

**AQUA PRO

An entry level general purpose buoyancy aid. Neck tie, waistband and bottom tie. Five years guarantee.

Sizes:

S 30-50 kg, **Part Number: 5319-003-1**

LIFEBUOYS AND M.O.B. SYSTEMS

Baltic have different models of lifebuoys for different purposes. Swedebuoy and Rescue Sling are stored to be released into the water and trawled around the distressed person who grabs the floating line. The crew can then pull the distressed to the boat and use the Swedebuoy/Rescue Sling to help them back on board. The horseshoe combination is for use in calmer environments, for example, in cases of overboard near land or in port.
