

Barz Optics
The Australian Sunglass Co.

CABO

The Cabo was nominated for a DAME award at the 2014 METS Trade Show in Amsterdam and won the Australian Marine Industry Award for the Most Innovative Exported Product in 2015.

The Cabo (half frame) floats in both fresh and salt water due to the built in air chambers in the nosepiece and temples of the frame.

The Cabo is available in four frame colours:

- Matt carbon fibre with dark grey nosepiece and non slip temples.
- Matt black with black nosepiece and non slip temples.
- Gloss white with royal blue nose piece and non slip temples.
- Gloss graphite with red nose piece and non slip temples.

Lens options are:

- Polycarbonate polarised high wrap lens – in grey, amber, grey with silver mirror and grey low profile (to suit flatter face shapes with shallow nose bridges (Asian as an example))
- Polycarbonate polarised with bi focal readers in their base. Available in grey or amber with +1.50, +2.00 or +2.50 powers.
- Polycarbonate polarised photochromic (the lens reacts to varying amounts of UV and in low light it's Cat1 and then darkens to Cat3 in full sun.
- Polycarbonate polarised photochromic bi focals – This is our award winning lens and is available in grey +1.50, +2.00 and +2.50. This lens is Cat1 (around 15% darkness in low or no light and as the sun and UV intensify the lens darkens to Cat3 (around 75% darkness)

THE FLOATER

The Floater model floats in even the most turbulent of water. There are air cells moulded into each temple and in the nose piece.

When fitted with the 1.1mm polarized lens it has a density of 0.95gm/ml. Fresh water is 1.00gm/ml and salt varies between 1.03 and 1.05gm/ml so the frame is very buoyant. The Floater frame is dual moulded from TR90 (a hybrid nylon in the main frame) and non slip senaprene in the temples and nose piece.

Frame colour options are:

- Gloss carbon fibre with grey non-slip temples and nosepiece.
- Gloss tortoise shell with tan non-slip temples and nosepiece.
- Matt black with dark non-slip temples and nosepiece.
- Matt grey with green apple non-slip temples and nosepiece.

What makes this model one of our best sellers is the variety of unique lens option available:

- Acetate 1.1mm thick polarized grey, amber, blue mirror or green mirror. The industry standard is a lesser quality 75mm.
- Acetate 1.1mm polarized photochromic lenses in grey or amber. These lenses lighten and darken depending on the available UV – there is around a 40% change from Cat2 to Cat3.
- Polycarbonate polarised – grey or amber.
- Polycarbonate polarised photochromic in grey or amber.
- Polycarbonate polarised bi focal reader in grey in +1.50, +2.00 and +2.50 powers.
- Polycarbonate polarised photochromic bi focal in grey (Award Winning) in the above powers.
- RX prescriptions can be fitted into this frame by most optometrists.

SAN JUAN

The San Juan model has air cells moulded into each temple. The TR90 frame is dual moulded with non slip temples and nose piece.

Frame options are:

- Matt black with grey
- Matt tortoise shell with tan
- Matt grey with red.

Lens options are: Acetate polarised grey or amber.

NAMOTU

The Namotu is a more fashion frame with large square lenses. It suits most adult face shapes. It is the favourite of Mark Richards the skipper of one of Australia's most successful sailing yachts - Wild Oats XI

Frame options are:

- Gloss tortoise shell with tan trim
- Gloss grey with red trim.

Lens options are: Acetate polarised grey or amber.

TAVAUURA

The Tavaura is a great fitting wrap frame with great peripheral vision and side glare protection. It suits most adult face shapes.

Frame options are:

- Matt steel blue with black trim
- Dark gloss grey with red trim.

Lens options are: Acetate polarised grey and amber.

KIAMA

The Kiama is our latest floating frame. Due for release in February 2019 it is available in two options. Fitted with normal sunglass temples or with a fully adjustable head strap as below which turns them into a goggle – ideal for jet skiing, SUPing, surfing, waterskiing or dinghy sailing.

Frame option is:

- Matt black with black non slip nose piece and temples

Lens options are: Acetate polarised grey or amber.

SEA SPRAY

The SeaSpray is a super lightweight goggle with a multitude of uses. Ideal for anywhere the elements can effect your vision. Ideal for sailing dinghy's, water skiing, Kite surfing, jet skiing, sky diving or for the jockey at the track.

The smoke frame is flexible while the impact resistant polycarbonate grey lens offers eye protection from foreign objects.

FLORES

The Flores is a superlight weight frame fitted with polycarbonate polarised lenses. Frame is gloss tortoise shell and lens options are polarised copper and G15 green.

SAMOA

The Samoa is a larger half frame fitted with grey polycarbonate polarised lenses. It has a fully adjustable nose piece so fits all face shapes.

ACETATE POLARISED

Barz Polarised Acetate range are fitted with 1.1mm acetate polarised lenses (The industry standard is a lesser quality .75mm lens).

FIJI

The Fiji frame is dual moulded and has an adjustable non slip nose piece for optimum fit.

It's available in:

- Gloss black / matt grey
- Gloss tortoise shell / matt tan frame

Lens options are: grey or amber.

NAURU

The Nauru Matt Black frame wraps comfortably around the wearers head and stays on even in the most trying conditions while giving maximum protection to the eyes.

Lens options are: Acetate polarised grey, amber, green mirror or blue mirror. The Nauru is also available with polarised photochromic lenses which darken from Cat 1 in low light to Cat 3 in full sun.

NIAS

The Nias is a more conservative squarish frame. It's available in matt black frame.

Lens options are: Acetate polarised grey, amber or blue mirror. The Nias is also available fitted with grey or amber photochromic polarised lenses.

MAUI

The Maui has had an update over the last year and now features dual moulded non slip temples.

Frame option is:

- Matt black

Lense options are: Acetate polarised grey, amber or blue mirror.
The Maui is also available fitted with grey or amber photochromic polarised lenses.

STRADDIE

The Straddie is one of our largest frames. It comes with side windows for extra protection.

Frame option is:

- Matt black

Lens options: Acetate polarised grey, amber or blue mirror.

TOFINO

The Tofino suits female or smaller men's face shapes.

Frame options are:

- Gloss tortoise shell
- Matt black

Lens options are: Acetate polarised grey, amber or blue mirror
The Tofino is also available fitted with amber or grey photochromic polarised lenses.

PIHA

The Piha is a smaller sports frame which suits ladies, teenagers and smaller face shapes.

Frame option is:

- Gunmetal grey

Lens options: Acetate polarised grey, amber or blue mirror.

BALI

The Bali is a smaller frame suits smaller faced adults and teenagers.

Frame options are:

- Gloss tortoise shell
- Gloss black

Lens options are: Acetate polarised grey or rose.

HERON

The Heron is available in gloss tortoise shell with tan non slip temples.

Lens options are: Acetate polarised G15 green and rose.

COOLIE

The Coolie is a classic style which offers great protection. It is dual moulded and offers non slip nose pieces and temples.

Frame options are:

- Matt grey
- Matt black

Lens options are: Acetate polarised grey or amber.

KONA

The Kona is available in two versions – with or without an insert behind the main lens (it will contain an RX prescription lens). It also has two removable side panels.

The frame is available in gloss gunmetal with grey polarised lenses.

ACETATE POLARISED WITH NON POLARISED READERS

Barz Polarised Acetate with non polarised readers are great for reading digital screens that may black out while wearing standard polarised lenses. The main lens is polarised – we then cookie cut out a hole in which we place a non polarised lens with magnification.

Not only can you wear them to read your instrumentation, but charts, mobile phones, a compass or any printed matter like a menu or newspaper. They are also great for those who are a little optically challenged to tie fishing line or work on fine detail projects.

STRADDIE

The Straddie is one of our largest frames and suit larger male faces.

The frame is available in:

- Matt black

Lenses are available in grey or amber +1.50, +2.00 or +2.50.

TOFINO

The Tofino is a mid sized frame that suits most face shapes.

The frame is available in:

- Matt black
- Gloss tortoise shell

Lenses are available in grey or amber +1.50, +2.00 or +2.50.

NAURU

The Nauru has a great wrap frame and offers maximum protection.

The frame is available in:

- Matt black

Lenses are available in grey or amber +1.50, +2.00 or +2.50

ACETATE POLARISED FITOVER SUNGLASSES

Barz Polarised Acetate Over glasses are designed to fit over the wearers normal optical frames. They are available in three size options.

CAIRNS

The Cairns is the largest of the frame so pretty well fits over all optical frames.

The frame available is:

- Matt black

Lens options are: Acetate polarised grey or amber.

LAGUNA

The Laguna is a mid sized frame and a little more fashionable. It fits most ladies glasses and doesn't have that bulky fit over look to it.

Available in gloss tortoise with grey polarised lenses.

1100

The 1100 is the smallest of the three frames – it's suitable to fit over many of the small metal optical frames.

Available in gloss tortoise fitted with amber polarised lenses.

KIDS SUNGLASS MODELS

THE GROOM

The kids Grom model suits between 5 and 12 year olds and will float in both fresh or salt water. It's fitted with our 1.1mm acetate lens and has the option of polarised or polarised photochromic. The photochromic lenses adjust with UV so are Cat1 in low or no light and darken to Cat3 in full sun.

Frame options are:

- Carbon with grey
- White with grey
- Blue with white
- Pink with grey

Lens options are: Acetate polarised grey, amber or photochromic polarised amber.

CAL

The Cal has a retro shape but is state of the art with it's dual moulded temples.

Frames are available in:

- Gloss blue with blue
- Gloss white with red

Lens options are: Acetate polarised grey or amber.

NAURU JUNIOR

It's a scaled down version of our best selling Nauru model.

The frame is available in:

- Matt black
- Gloss red

Lens options are: Acetate polarised grey or amber.

NEEMO

The Neemo is suitable for 6 to 11 year olds.

The frame is available in:

- Gloss burgundy
- Gloss black

Lens options are: Acetate polarised grey or amber.
