

Gill

GILL Fabrics.

Our clothing was created for the water. Our clothing performs on the water.

DIFFERENT FABRICS

Today all fabrics are breathable so the choice comes down to the handle and feel, which is affected by the weight, density of the weave, and whether the proofing is a coating or laminate.

COATINGS

Coatings are a more traditional approach to proofing a garment. A Polyurethane based resin is spread onto a woven fabric. It first has to fill in the weave undulations to seal it and then build up a layer that covers it all evenly. Finally, the fabric is dipped into a DWR solution for water repellence on the exterior.

LAMINATES

Laminates are a more recent development. A laminated waterproof fabric is created by bonding a thin membrane to a woven outer layer. This means the thickness of this laminate film can be finely controlled. The end result is a fabric that is lighter and waterproof. It is more flexible, softer and much more comfortable to wear.

Fabrics Explained.

TWO, THREE OR FOUR LAYER FABRIC?

Conventional waterproof fabrics fall into three main categories:

TWO LAYER

Lighter than most fabrics, this features on our Coastal, Inshore and Dinghy styles.

1. Woven textile with durable water repellent finish
2. Laminated or coated waterproof and breathable finish

THREE LAYER

This lightweight, yet durable fabric features on our Race Fusion range.

1. Woven textile with durable water repellent finish
2. Waterproof and breathable coating
3. Lightweight mesh to protect coating and for next to skin comfort

FOUR LAYER

Built for the toughest conditions, this fabric features on our Race Ocean, OS1 Ocean and Drysuit.

1. Robust protective material, abrasion resistant, water repellent
2. Hydrophilic coating to channel moisture away from the body
3. Hydrophobic laminate, flexible waterproof barrier to repel water, but still allows water vapour to escape
4. Ultra-lightweight wicking scrim to protect the waterproof layers from damage

A full-page photograph of a sailor in a dark blue and red Gill wetsuit and a red and white helmet, running on the deck of a sailboat. The sailor is wearing a red harness and blue athletic shoes. The background shows a harbor with other boats and a clear blue sky. The Gill logo is visible on the sailor's leg and the top left of the page.

Gill

Dinghy

Our new Dinghy range has been put through its paces by the best. Designed and engineered to offer maximum flexibility whilst protecting you from the elements; from our pinnacle range Firecell, to Zentherm which has been created for warmth, to finally the lighter fabric of Zenlite to keep you cooler in warmer conditions – all have the technical capabilities required for this demanding sport. Versatile garments that can be mixed and matched in single or combined layers – so even if the temperature changes your performance won't.

Dinghy Icons Explained

X4 Flex Technology

Ultraspan underarm and side flex panels that allow complete freedom of movement.

Power TXCOAT

High abrasion resistance rubber coated neoprene panelled on key wear areas.

Glideskin

Low-friction glideskin seals offer warmth and comfort against the skin and protection from chaffing.

Di-Guard

The high tenacity Di-Guard Neoprene panels protect against wear generated through contact with the boat. Strategically placed to resist abrasion and prolong the life of your suit.

FireCell Technology

The Fire cell air technology is a complex 3D structure of neoprene and works on the principle of trapping air space.

Helioflex

Water Repellent, high stretch thermal fabric. Dries quicker than standard plush and has an incredible thermal quality.

Thermal Protection Technology

Strategically placed thermal plush inner panels to trap body warmth.

Eco Flex

Knitted with recycled yarns.

RACE DINGHY

RS18_RACE SYNCHRO PFD

Technology:

- EN ISO 12402-07 50 Newton certification

Features/Benefits:

- Close fitting design with soft foam panels for improved fit and comfort
- Tough ripstop outer fabric
- Large slimline pocket with stretch mesh to reduce bulk
- Reflective safety detail for visibility

Fabric Composition:

- 100% Nylon, PVC Foam

Colours/Sizes:

EYEWEAR

Race Technology

Superior injection moulded lens technology. 10 times greater impact protection, improved clarity, salt water and scratch resistant.

Glare-free vision

Polarized lenses block the glare produced by light reflecting off the water or bright deck surfaces which can create a distracting haze; a real issue when you're looking for marker buoys or checking sail trim. Optically-corrected, shatter-resistant cushion elements are laminated to both sides of the UV absorbers, followed by a unique scratch resistant coating applied to the outer surfaces.

Natural colours

Filter category 3 lenses allowing 8-18% light transmission and are useful in bright sunlight, driving and general purpose wear.

100% UV400

UV light absorbers, which block 100% of harmful UVA, UVB, and UVC radiation.

Reduced eye fatigue

A quality optical lens is used to prevent vision distortion as cheaper lenses bend and misdirect light so that sizes, shapes and even distances can become distorted – leading to eye strain as you're forced to compensate. They comply with European Class 1 Optics Standards.

Floatable

Designed for life on the water, all Race and Performance sunglasses float.

Hydrophobic

Hydrophobic outer coating sheds water and reduces salt residue for clear vision.

Oleophobic

Oleophobic technology applied to the inside face repels fingerprints, sun lotion and skin oils. This is the same technology found on touch-screen devices to reduce finger marks.

All of our garments are sized and fitted with end use in mind, we have defined our different types of fit here. Products not labelled as one of our other specific fits will be a regular fit.

Next to Skin
Follows the contours of the body giving freedom of movement.

Slim Fit
Closer fit, giving a silhouette that skims over the body.

Regular Fit
Neither close fitting or oversized, designed to be versatile and fit as expected for the products' intended end-use.

Relaxed Fit
Cut looser with more room around the body. Ideal for layering over other pieces.
