58 KAYAK

The kayak's best friend. For serious paddlers there is no better choice than the 58 Kayak compass. It's small, waterproof, lightweight and has a unique attachment solution developed for kayaks. The rubber straps with clips attach easily to the deck lines, without any need to drill in the deck. The possibility to locate the compass right in front of you makes it easy to read without letting go of the paddle - and you don't need to drop your gaze from the horizon when checking your course. The compass has scratch resistant glass to withstand even the toughest conditions.

Part Number: 36528-0755

C58

C58 is a bracket mounted steering compass designed for movement and optimized for powerboats. Fitted with a detachable bracket, it can be mounted on almost any vehicle, including power boats, and in almost any direction: horizontally, vertically or up-side-down. The 12V integrated illumination makes the C58 suitable for night navigation. With multiple mounting plates (one included) you can easily move your compass between vehicles as well as between different places on your boat. The compass comes with the feature of built-in deviation compensator which allows adjustments (up to $\pm 40^\circ$) if the compass is interfered by another magnetic field.

Part Number: 35730-0755

70UN

This universal compass can be used in its bracket as a steering compass or as a handheld sighting compass. The compass can be installed in any inclination or position, even upside down. It is easily detached from the bracket to enable temporary sighting use or for security purposes. With a main steering scale on the horizontal part and direct reading on the vertical edge, 70UN is ideal for boats with a sitting as well as a standing helmsman. The curved lubber line enables swift and clear reading at a glance, without parallax errors. If dropped in the sea, it floats! Suitable for small boats, kayaks, dinghies, canoes, etc.

Part Number: 35014-9015

70P

A bulkhead mount compass designed for yachtsmen that demand absolute accuracy and a steady card in all conditions. The 70P handles unlimited slope of the keel line and a 30° heeling angle. The curved lubber line enables swift and clear reading at a glance without parallax errors. With a main steering scale on the horizontal part and direct reading on the vertical edge, 70P is ideal for boats with a sitting as well as a standing helmsman. The 70P can be mounted at most angles and its compact size (70 mm) makes it suitable for smaller boats.

Part Number: 34990-9015

70NBC

70NBC is a compass for yachtsmen relying on exceptional stability in all conditions. The cone-shaped, no-spin compass rose is virtually unaffected by boat speed or engine vibration. The compass has a main steering scale on the horizontal part and direct reading on the vertical edge, making it ideal for boats with a sitting as well as a standing helmsman. The integrated illumination in the adjustable protection cover makes night navigation easier. The built-in compensator allows you to adjust the compass if it is disturbed by a magnetic deviation. 70NBC comes in a bracket mount.

Part Number: 35006-0115

70FB

70FB is a flush mount compass that can be mounted at any angle from vertical to horizontal, perfect for dashboard mount. Adjustable illumination in the protection covers.

Part Number: 34998-0115

70B

70B is a bracket mount compass that can be mounted at any angle from vertical to horizontal, perfect for dashboard mount. Adjustable illumination in the protection covers.

Part Number: 35011-0115

85

A stable compass for small, fast boats. The 85 has a memory ring for setting the desired course. Clear scales and quick readability make this compass perfect for navigating in high speeds. The flatbottom design enables flush installation without making large holes in the boat. A common configuration is two 85 compasses, one on each rail. This enables you to move around more freely. Thanks to the excellent dampening of the compass card, model 85 is suitable for high speeds and rough conditions.

Part Number: 37171-0005

85E

A stable compass with excellent dampening, perfect for small boats in high speeds and rough conditions. The clear scales and rapid readability of the compass card are advantages that make the 85E great for high speed navigation and rough seas. Thanks to the integrated illumination, it is also suitable for night navigation. The flatbottom design enables flush installation without making large holes in the boat. A common configuration is two 85 compasses, one on each rail.

Part Number: 37174-0015

100BC

This front reading compass with a solid bracket that enables various mounting alternatives, including on the headlining. It has a main steering scale on the horizontal part of the compass rose and direct reading on the vertical edge. This makes the compass ideal for boats with a sitting as well as a standing helmsman. The integrated illumination makes night navigation easier. The built in compensator allows you to adjust the compass if it is disturbed by a magnetic deviation.

Part Number: 37177-0155

125B/H

125B/H is a bulkhead-mounted compass designed for sailboats and yachtsmen that demand absolute accuracy, a steady card in all conditions and heeling angles.

A main steering scale on the horizontal part and direct reading on the vertical edge make it ideal for boats with a sitting or a standing helmsman. With the front heeling scale you can easily keep track of the heeling angle. The compass also features built-in illumination that makes night navigation easier. The three lubber lines permits reading from the rail or from a place at the side of the steering position.

Part Number: 37192-0015

125FTC

125FTC is a compass designed for boats and yachtsmen that demand absolute accuracy and a steady card in all conditions and heeling angles.

It is flush-mounted, with an apparent scale size of 125 mm and a gimbaled cradle. Features include the possibility to compensate for magnetic field disturbance, integrated illumination in the adjustable protection cover for ideal night vision and counter-balanced lubber lines that remain vertical even in rough seas. The extended center needle eliminates parallax errors and facilitates off course bearings.
